👤 PROFILE

Snowflake Certified Data Science / AI/ML / Generative & Agentic AI / Data Engineering Professional engaged in the IT sector for over **7+ years** with a strong desire to take on a dynamic role that embraces innovation and complex problem-solving.

- Demonstrates expertise in **Generative AI & Machine Learning** techniques (both Supervised and Unsupervised) and experience in **Data Engineering, ETL/ELT** operations, utilizing platforms like **Snowflake, DBT, Astronomer** and **Google Big Query**, paired with proficiency in **SQL** and **Python**, with a focus on **Consumer Analytics**.
- Worked in **Banking & Finance, FMCG & Retail, Fraud & Securities and SaaS** domains.
- Good understanding of the entire AI/ML & Data Engineering solutions life-cycle, from development to the deployment of advanced data pipelines.
- Analytical thinker with superior communication and organizational talents, eager to expand knowledge and adapt to emerging technologies and practices.

👛 PROFESSIONAL EXPERIENCE

AI/ML ENGINEER

Blue.Cloud 🔗

04/2023 – present
Pune, India

As an AI/ML Engineer, I spearheaded

- **Agentic AI & MLOps:** The design and architecture of SnowMigrate360 and SnowML360, utilizing LangGraph and **Multi-Agent Systems** to build autonomous SQL migration engines (with a 7-step validation system) and end-to-end ML lifecycle management platforms natively within Snowflake.
- **Enterprise Data Migration:** A large-scale BigQuery/multi-platform-to-Snowflake migration for a major Danish-American SaaS provider. Consolidated rich Customer, Finance, and Security datasets using **DBT, Snowflake** and **Astronomer**, utilizing CI/CD pipelines for consistent Agile deployments.
- **Advanced Analytics:** Causal inference modeling to analyze complex customer interactions, delivering data-driven insights that directly improved engagement and retention within the Snowflake Marketplace ecosystem.

DATA SCIENTIST SENIOR ANALYST

Accenture 🔗

11/2021 – 03/2023
Pune, India

As a Data Scientist Senior Analyst, I was responsible for designing AI/ML Pipeline, development and deployment of Supervised Machine Learning models on Azure Cloud. I collaborated with

- an American Technology Company which mainly deals in **Cyber-Security** and **Fraud** based on telemetry data.
- a leading Indian **NBFC Fintech** Organization which mainly deals in **Consumer Durable Loans** for **cross-selling** of personal loans.
- a Multinational Brewing Organization which mainly deals in Alcoholic and Non-Alcoholic Beverages in APAC & EMEA region for the analysing the impact of Digital Media.

DATA SCIENTIST

NutaNXT 🔗

11/2019 – 11/2021
Pune, India

Held a position as a Data Scientist, applying analytical expertise to advance product innovation and business intelligence.

- Served at an **Applied Spectral Knowledge** firm, developing scientific devices aimed at **Anomaly Detection** in **FMCG / Retail** edible products and drug **identification** and **quantification** for the **healthcare** sector.
- Managed full-cycle development and deployment of business algorithms for Raman Spectrophotometer (version 2) instruments.
- Engaged with an **NBFC Fintech** company, focusing on Customer Lead Scoring for Small & Medium Size Enterprises.

SOFTWARE ENGINEER (Intern)

Indian Oil Corporation Ltd.

06/2017 – 05/2018
Patna, India

As a Software Engineer, I was responsible for

- managing client relations, addressing technical needs and developing automation solutions within the organization.
- applied Java and SQL expertise to meet and solve complex business requirements.

 SKILLS

- | | |
|----------------------------------|----------------------------|
| • AI/ML | • Data Engineering |
| • Python | • SQL |
| • Snowflake | • Astronomer - Airflow |
| • DBT | • Databricks |
| • Cloud Platforms (Azure & GCP) | • Generative AI/Agentic AI |
| • Deep Learning / NLP | • OpenCode/Hermes |
| • LangChain/LangGraph | • Docker / Kubernetes |
| • FastAPI / Flask | • ETL/ELT Processes |
| • Data Pipelines & Orchestration | • Vector Databases |

 CERTIFICATES

- | | |
|---|--|
| • Gen AI Foundation  | • Generative AI with Large Language Models  |
| • SnowPro Advanced: Data Engineer Certification  | • SnowConvert for Developers  |
| • Snowflake Core  | • Astronomer Certification for Apache Airflow 3 Fundamentals  |
| • Astronomer Certification DAG Authoring for Apache Airflow 3  | • Google Cloud Certification: Cloud Architect  |
| • Google Cloud Big Data and Machine Learning Fundamentals  | |

 PROJECTS

- | | |
|--|-------------------|
| <p>SnowMigrate360 - Snowflake Accelerator</p> <p>An AI-powered SQL, multi-platform SQL Migration Assistant Workbench that converts SQL code from 18 different database platforms into validated, optimized Snowflake-compatible SQL. The conversion engine use a SnowMigrate Agent powered by LangGraph state machine that orchestrates multiple specialized agents with a 7-step validation system. Additional capabilities include SQL optimization, code execution with dry-run validation, data loading, Python-to-SQL-conversion, and Cortex-CLI like Agent Terminal UI.</p> | 04/2026 – Present |
| <p>SnowML360 - Snowflake ML Accelerator</p> <p>A comprehensive, reusable ML lifecycle management platform built for Snowflake environments. It enables data teams to build, deploy, and monitor ML models without leaving Snowflake ecosystem. The platform includes an AI Agent for autonomous ML development, domain specific skills and Snowflake Feature Store integration with full MLOps capabilities and AI-powered autonomous development.</p> | 04/2026 – Present |
| <p>Enterprise Data Migration & Modeling - Zendesk</p> <p>Led a robust data migration initiatives for Zendesk ZDP within the EDA team to consolidate Customer, Finance and Security Data from multiple instances to a centralized Snowflake Data Warehouse, leveraging DBT for data transformation and Astronomer for workflow orchestration. The project involved extracting rich datasets from Google BigQuery, Salesforce, Workday, etc. and utilizing CI/CD pipelines for consistent deployment in an Agile environment to enable reliable, centralized analytics and reporting.</p> | 06/2023 – 03/2026 |

Causal Inference Modelling - Snowflake Accelerator

04/2023 – 05/2023

Leveraged Snowflake to analyze complex customer interaction data using advanced statistical models to identify causal relationships, delivering actionable insights that improved marketplace engagement and strategic decision-making.

Customer Validation - F5

12/2022 – 03/2023

Optimized scoring models to detect Account Origination and Account Takeover fraud based on real users' device telemetry fingerprints captured by a proprietary software.

Personal Loan Crosssell - Bajaj Finserv

09/2022 – 12/2022

A customized scorecard for the cross selling of personal loans to the customers who has already taken Consumer Durable loans from the organization targeting various segments and determining their creditworthiness for underwriting new loans.

Consumer Care - AB InBev

03/2022 – 08/2022

An end to end cognitive system for collecting and analysing consumers' response and likelihood for the brand and discovering the value insights for all products.

- Generate insights on Multi-lingual Consumer Calls, prioritizing Critical cases, categorizing and classifying its relations with the processes for all business regions using Azure Cognitive Services and Natural Language Processing deployed over Azure Cloud.
- Automate the prioritization of tickets raised for each call on real-time to handle consumer issues, threats and preventing cases escalation.
- Generated Insights Reports based on business categories for given timeline helping business team for quick actions on the issues facing by the consumers.

Delivery Route Optimization - AB InBev

01/2022 – 02/2022

Assisted in development of Delivery Linking Tool based on Vehicle Routing Problem for finding the optimal routes for the quick and organised delivery of goods for the organization's EMEA region. The Linking Tool helps the organization reducing more than 20% costs on transportation.

Drugs Quantification & Product Authentication- Oak Analytics

03/2020 – 11/2021

An RPI-based spectrometer was designed and developed based on the discovery made by Indian Nobel laureate Dr. C.V. Raman, combining spectral analysis with AI/ML, Signal Processing, and Image Processing techniques. This helped to move expensive analytical devices into the field for instant molecular authentication. This rapid, non-invasive, high-tech, low-cost method has enabled the federal government identify and analyse drugs and medicines while lowering the danger associated with pharmaceuticals. The Raman-I Spectrometer gadget serves as the foundation for the scientific equipment, however it has been upgraded to mitigate mechanical issues.

Lead Identification - NeoGrowth Credit

11/2019 – 02/2020

By building machine learning model, helped an NBFC Fintech client to increase the number of disbursal from online channel. This also resulted into significant decrease in the total customer acquisition cost, cost of disbursement, cost of client appointment and cost of overall lead servicing.

PMUY - Indian Oil Corporation

06/2017 – 05/2018

Pradhan Mantri Ujjwala Yojana is a government plan launched by PM in 2016 to distribute 50 million LPG connections to women of BPL families in India. The aim of this plan is to safeguard the health of women and children by providing them with a clean cooking fuel- LPG and empowering and protect their health by reducing the serious health hazards associated with the cooking based on fossil fuels.

 EDUCATION**MASTER IN SCIENCE (CA), DATA SCIENCE**

SYMBIOSIS INSTITUTE OF COMPUTER STUDIES AND RESEARCH

2018 – 2020

Pune, India

BACHELORS IN COMPUTER APPLICATIONS (HONOURS)

ADMERIT GLOBAL BUSINESS SCHOOL, PATNA.

2014 – 2017

Patna, India
